PEST MANAGEMENT

ABOUT MISARMA

Since 2009, Misarma Enterprise Sdn. Bhd. (MESB) has been a trusted name across the timber, construction, marine, and oil & gas industries. In line with our commitment to innovation, we've expanded our expertise to include pest control and fumigation services — serving a range of clients from timber facilities and buildings to marine vessels.

Recognized by the Department of Agriculture Malaysia, Misarma delivers comprehensive, eco-friendly, and cost-effective pest management solutions that meet global standards. Our professional team is continuously trained and equipped with the latest technology to ensure safe, efficient, and long-lasting results for every client.

Pest Management

At Misarma Enterprise, we ensure your shipments meet all government export and import requirements, guaranteeing smooth and compliant customs clearance. As an accredited service provider under MAFAS (Malaysia Fumigation Accreditation Scheme), AFAS (Australia Fumigation Accreditation Scheme), and ISPM-15 (International Standards for Phytosanitary Measures No.15), we deliver fumigation services that adhere to international standards.
Beyond export fumigation, we also provide comprehensive pest control and fumigation solutions for warehouses, vessels, and storage facilities, including those handling grains, furniture, and other commodities, ensuring your goods remain protected, pest-free, and trade-ready.

What We Offer

- ### Fumigation

Specialized treatment that uses gaseous chemicals (fumigants) to eliminate pests hidden deep within products, packaging, or enclosed spaces. It is typically used for export goods, stored commodities, vessels, and warehouses to meet international quarantine and trade requirements.

- ### Pest Control

Involves a broader range of preventive and corrective measures such as spraying, baiting, and trapping to manage and control pests like rodents, ants, cockroaches, and flies in residential, commercial, or industrial environments.

How We Work?

01

Site Inspection & Assessment

Conduct an on-site inspection to assess pest types, infestation levels, and risk areas, and document findings for treatment planning.

02

Consultation & Proposal

Present a detailed assessment report and recommended treatment plan with customized solutions, cost estimates, and preventive measures in compliance with Jabatan Pertanian Malaysia regulations.

03

Treatment Preparation

Secure the area, ensure safety measures, and prepare approved eco-friendly chemicals and equipment for treatment or fumigation.

04

Pest Control / Fumigation Execution

Apply the most suitable treatment such as spraying, misting, baiting, or fumigation while strictly following international safety standards.

05

Monitoring & Verification

Inspect treated areas, verify pest elimination, and provide a follow-up report with results and recommendations.

06

Preventive Maintenance & Reporting

Provide a maintenance schedule with ongoing monitoring, re-treatment if needed, and full documentation with compliance certificates.

Why Choose Us?

Since 2009

- Proven Expertise
- Certified & Compliant
- Custom Solutions
- Safe & Eco-Friendly
- Fast Response

FUMIGATION

QUARANTINE FUMIGATION OF WOOD AND TIMBER

Our specialized treatment targets wood-boring insects such as beetles, termites, and borers, preserving the strength and quality of your timber products. Each fumigation process is carried out under strictly controlled conditions, where your timber is securely covered with a gas-proof tarp and sealed using sand snakes to maintain a perfect gas enclosure.

VESSEL FUMIGATION

Misarma Supply provides thorough fumigation for ship holds, cargo areas, and compartments to eliminate pests that may affect cargo quality and compliance. Our trained team follows strict safety standards and port regulations to ensure each treatment is done safely, efficiently, and with minimal disruption. Whether before loading or after discharge, we keep your vessel clean, compliant, and ready to sail.

CONTAINER FUMIGATION

We provide controlled, gas-tight fumigation for export and import containers, effectively treating commodities such as grains, food products, machinery, and raw materials.
Each treatment is carefully monitored to ensure complete pest eradication and adherence to international biosecurity standards. With our certified services, you can ship with confidence knowing your cargo meets all quarantine and inspection requirements at its destination.

ISPM-15 CERTIFICATION

We provide certified fumigation and treatment in accordance with the International Standards for Phytosanitary Measures (ISPM 15), a requirement for all wood packaging used in international trade.
Our certification process verifies that your wood materials have been properly treated to eliminate harmful pests and comply with quarantine regulations. Each batch is marked with the official ISPM 15 stamp, giving your business the confidence to ship globally without risk of rejection or delays.

PEST CONTROL

Keep your facilities and operations pest-free with Misarma Supply's General Pest Control Solutions. We deliver safe, effective, and eco-friendly treatments tailored for commercial, industrial, and marine environments.

Our certified team provides targeted control for rodents, crawling and flying insects, termites, mosquitoes, and stored product pests. We also offer routine inspection and maintenance programs for lasting protection and peace of mind.
