SELANGAN BATU / YELLOW BALAU

It is a durable timber species you can commonly find in Southeast Asia. Selangan batu is commonly used for structural purposes, marine uses and freshwater construction and decking. Selangan batu is naturally durable, long lasting and durable.

Look for our FSC™ - certified products.

PINE

Pine wood is commonly used in manufacturing and carpentry. It can be used for decorating purposes such as flooring, windows, furniture and many more.

Look for our FSC™ - certified products.

SPURCE

Spruce is a light and soft timber. Even though spruce is light and soft, it has good strength and elasticity properties. It is not susceptible to shrinking and when dried it will remain the same. Applying a protective coat of paint can help to compensated for its low level of natural durability.

Look for our FSC™ - certified products.

MERBAU / KWILA(PNG)

Merbau timber is commonly used for decorative purposes. This is because of its natural colour and growth ring figure. The timber is suitable for interior finishing, panelling, mouldings, office fittings, flooring, superior joinery, cabinetmaking, musical instruments, ornamental items and carvings.

Look for our FSC™ - certified products.

WHITE OAK

Due to its strength and resistance to decay, white oaks is used in a wide range of application. This includes shipping and boat building, flooring, architectural joinery, exterior joinery, railways sleepers and timber bridges.

Look for our FSC™ - certified products.

WALNUT

Walnut timber is a dense and strong wood. Commonly needed in expensive furniture and carpentry. Walnut timber is use d for furniture, musical instruments, carvings, trims and veneers.

Look for our FSC™ - certified products.
